PROFESSIONAL SUMMARY

Computer Science undergraduate at Vellore Institute of Technology, Chennai with a CGPA of 9.44/10, skilled in Artificial Intelligence, Machine Learning, Full-Stack Development, IoT, and Modern Web Technologies. Experienced in building AI-powered healthcare applications, logistics platforms, predictive machine learning models, and immersive web experiences. Passionate about developing scalable software solutions that solve real-world problems.

EDUCATION

Vellore Institute of Technology, Chennai

Bachelor of Technology (B.Tech) – Computer Science and Engineering

2024 – 2028

CGPA: 9.44 / 10.00

DRM Public School, Ayodhya

CBSE – Class XII

2023

Percentage: 86%

JB Academy, Ayodhya

CBSE – Class X

2021

Percentage: 98.4%

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, C++

Frontend Development: React, Next.js, HTML5, CSS3, Tailwind CSS, Three.js, React Three Fiber

Backend Development: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, JWT Authentication, Supabase

Artificial Intelligence & Machine Learning: Machine Learning, Scikit-Learn, Pandas, NumPy, OpenCV, Computer Vision, Data Preprocessing, Feature Engineering, Model Evaluation, LLM Application Development

Embedded Systems & IoT: ESP32, Raspberry Pi Pico, GPS, GSM, Blynk, Wokwi

Developer Tools: Git, GitHub, Docker, Postman, VS Code, Vercel, Render

PROJECTS

MedSimplify – AI Medical Report Analyzer

React, Python, OpenAI API, Chart.js

- Developed an AI-powered healthcare platform that transforms complex medical reports into concise, patient-friendly summaries.
- Integrated AI-assisted report analysis, report history, and interactive visualizations.
- Built a responsive React frontend with seamless AI and backend API integration.

MoveSphere – Logistics Management Platform

React, Node.js, Express.js, MongoDB

- Developed a full-stack logistics management platform for shipment handling and transportation workflows.
- Built secure authentication, RESTful APIs, and scalable backend services.
- Designed responsive dashboards with a modular architecture for efficient logistics operations.

Heart Failure Prediction System

Python, Scikit-Learn, Pandas, NumPy, Streamlit

- Developed a supervised machine learning model for heart failure risk prediction using clinical datasets.
- Performed preprocessing, feature engineering, model training, and evaluation.
- Built an interactive prediction interface for healthcare decision support.

Smart Irrigation System – AI-Enabled Intelligent Irrigation Controller

ESP32, Embedded C/C++, IoT, Machine Learning

- Developed an ESP32-based intelligent irrigation system using real-time soil moisture sensing and embedded automation.
- Designed an AI-assisted irrigation framework that estimates crop water requirements using crop growth stage, soil moisture, and environmental data.
- Implemented Automatic, Manual, and OFF modes for adaptive irrigation and efficient water management.

Bhajjamaal & Sons – Immersive 3D Web Experience (Currently Under Development)

Next.js, TypeScript, React Three Fiber, Three.js, Tailwind CSS, Supabase

- Developing an immersive 3D web platform featuring realistic environments and interactive navigation.
- Building scalable frontend components with React Three Fiber and Three.js.
- Integrating backend services to support future AI-powered and e-commerce capabilities.

ACHIEVEMENTS

- Academic Rank 3 – First Year, B.Tech Computer Science & Engineering, Vellore Institute of Technology, Chennai.
- Academic Rank 4 – Second Year, B.Tech Computer Science & Engineering, Vellore Institute of Technology, Chennai.
- Maintained a CGPA of 9.44 / 10.00 throughout the B.Tech program.

POSITIONS OF RESPONSIBILITY

AVR Club – VIT Chennai

- Contributed to organizing technical events, workshops, and student engagement activities.
- Collaborated with cross-functional teams to support innovation-focused initiatives within the university.

LANGUAGES

English, Hindi, Japanese
